

# OPSIAL®

## AIR'PRO

### A2P3 half-mask

P702KCI

A2P3

374g

### APPLICATION

Protection A2 against pesticides, paints and solvents

Protection P3 against highly-toxic particles and toxic solid and/or liquid aerosols: dusts from chromium, cobalt, lead, cadmium, hardwoods (oak, beech), asbestos (low concentration), silica, granite, ceramic fibres, legionella (short duration).

### BONUS

Compact, lightweight and comfortable.  
Unique patented filter technology: **highly improved breathing.**  
Filters out 99.95 % of dust (mean diameter 0.3 microns).

### Caractéristiques

#### Matériaux :

- Mask: Medical grade TPE in compliance with ISO 10993-10: 2010 relative to irritation. Latex and silicone free, odourless mask body. Nylon valve, Inhalation/Exhalation silicone diaphragm. 4-point adjustable elastic head and neck strap with TPE pad for comfort.
- Gas filters: Activated carbon filters in an ABS shell
- Particulate filters: mechanical HESPA-type synthetic filtering media with moulded TPE insert. Particulate filters are coupled with the active carbon element.

Shelf life: 3 years

Size	SKU number
M/L	63 084 107
S/M	63 435 759 (not on stock)

### Description

- Compact, lightweight and comfortable A2P3 reusable half-mask
- Hugs the face
- Air flow diffusion system inside the filter for full use of the activated carbon
- **Exceptional breathing comfort:**
  - Patented pleated encapsulation technology for a larger filtration surface area
  - The synthetic HESPA® material uses mechanical filtration, giving greater comfort than electrostatic filtration used in disposable masks
  - Large central exhalation valve, highly effective for evacuating CO<sub>2</sub> and heat
- Compact design suitable for **glasses wearers**
- Supplied with integrated replaceable filters

### Standards

- Half-mask in compliance with EN 140: 1998
- Filters in compliance with standard EN 14387: 2004 + A1: 2008 A2P3 RD

### Packaging

- Single unit box
- Box of 10 masks
